
CQM REMINDER

Please check your CQM date and ensure you are ready for your validation!

Remember:

- at least **3 months** of records are required to be completed prior to validation
- we recommend you complete your **in-class training at least 4-6 months before your due date**
- after your in-class training, an on-farm training session will be scheduled

Call the clinic to book your in-class training

Calf Pneumonia Issues?

Problems with pneumonia in calf barns, or calf rooms? There is excellent research behind the benefits of ventilating calf barns and calf rooms with a positive pressure (tube) ventilation system. Dr. Mac Littlejohn recently travelled to Madison WI to become educated on the design, installation and trouble shooting of such systems. If you think your calves would benefit from such a system, or you feel your existing system is not working properly talk to your herd veterinarian or call the clinic to book an appointment with Mac.
